## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4 and 10-11, drawn to coating fibers and fabric, classified in class 252, subclass 8.61+.
  - II. Claims 5-6, drawn to a method of producing a wood treatment product, classified in class 106, subclass 15.05 and/or class 424, subclass 762.
  - III. Claims 7-9, drawn to method of enhancing viscoelasticity of sunscreen formulations, classified in class 424, subclass 59.
  - IV. Claims 12-13, drawn to a method of providing an automobile polish and paint sealer, classified in class 106, subclass 3.
  - V. Claims 14-15, drawn to a method of providing a rust remover, classified in class 106, subclass 14.05.
  - VI. Claims 16-17, drawn to a method of providing a leather treatment product, classified in class 252, subclass 8.57.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-VI are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and/or effects as each

one concerns the addition of polyisobutylene to different products that are unrelated to each other as a composition for treating fibers is different than one for treating wood etc.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and thus the search required for each of Groups I-VI is different and not required for each other, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Peter McGee on 20 August 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
